Education

Vellore Institute of Technology (VIT)

July 2022 – June 2027

Integrated M.Tech in Computer Science and Engineering | CGPA: 8.61

Amaravati, Andhra Pradesh

Experience

Indian Institute of Technology, Dhanbad (IIT)

December 2025 – January 2026

Research Development Engineer Intern

Dhanbad, Jharkhand

- Deployed a **Python**-based traffic intelligence platform using **FastAPI** and **Streamlit** by integrating real-time datasets across **60+** monitored campus locations.
- Reduced prediction error by **15% (MAPE reduction)** by implementing **LSTM** and **GRU** time-series models to manage **10,000+** records stored in **PostgreSQL**.
- Implemented **REST APIs** and **WebSocket-based** live visualization and deployed scalable backend services using **Docker** on **AWS Cloud** environments.

Aatral Technologies India Pvt Ltd.

June 2024 – August 2024

Software Engineer Intern

Bengaluru, Karnataka

- Built and enhanced reusable frontend components for enterprise web applications using **React.js**, **HTML**, **CSS**, and **JavaScript**, improving UI consistency across modules.
- Integrated **MySQL database** for efficient data fetching from the backend, optimizing query performance during internal testing.
- Collaborated with a team of 5 developers to analyze application performance, debug issues, and streamline user interaction workflows.

Projects

CampusKart AI | *React.js, Node.js, Redis, MongoDB, Gemini API, Express.js*

November 2025

- Built an **AI-powered full-stack** e-commerce platform supporting authentication, product listing, cart workflows, and management of products.
- Optimized backend performance by implementing **Redis** as a caching layer for product listings, and **Gemini API** for personalized product search, reducing **MongoDB** read latency and improving response times.
- Integrated an **Interview Intelligence** module to analyze and categorize placements experiences for student preparations.

OneDrop | *MongoDB, React.js, Node.js, Express.js*

January 2026

- Engineered a **cross-platform application** for real-time donor-recipient matching using **Geolocation APIs** to minimize emergency response latency.
- Architected a live system using **React** to manage donors, hospitals, and emergency requests, optimizing navigation and user experience.
- Implemented a robust notification system with **SMS and Mail Authentication** using Node.js to verify donor and secure sensitive user data and won a **Health hackathon** held in our University.

Doc Query AI | *Python, React.js, FastAPI, Streamlit*

December 2024

- Built a backend AI-powered document question-answering system using **FastAPI**, leveraging **Retrieval-Augmented Generation (RAG)** for contextual responses and Semantic Search for precise insights.
- Implemented document preprocessing and **Semantic search** and integrated with a **React.js** frontend and Selected as a finalist in the **Infosys Bangalore DC Program** among 30+ teams.

Technical Skills

Languages: C++, Python, HTML/CSS, JavaScript, SQL.

Technologies & Frameworks: React.js, Node.js, Express.js, FastAPI, WebSockets.

Databases & Caching: MongoDB, PostgreSQL, Redis, MySQL.

Tools: Docker, Git, GitHub, Postman, REST APIs.

AI/ML: LSTM, GRU, Retrieval-Augmented Generation (RAG), Semantic Search.

Core CS: Data Structures & Algorithms (DSA), DBMS, OOPs concepts.

Leadership / Extracurricular

- Achieved a 1315 contest rating on **LeetCode**, demonstrating strong problem-solving skills in competitive programming.
- Secured **3rd place** at **VIT ECS'23** for building a **Smart Ration Distribution Management System** that digitizes government service workflows.
